

ePortfolio

IUPUI HIGH-IMPACT PRACTICE TAXONOMY

Description

ePortfolios are a framework for learning, a space for students to collect evidence of, reflect on, articulate, and create new learning over time. ePortfolios support powerful teaching and learning, assessment, student development, advising and career counseling, and professional and personal identity development along the pathway to graduation. Composing an ePortfolio helps students learn to communicate in multiple modalities, responsibly manage their online identities, and develop as learners and emerging professionals. ePortfolio practice can help students integrate learning across the curriculum, co-curriculum, and experiences outside school, contributing to a more meaningful and purposeful educational experience. ePortfolios offer rich information for assessment and improvement of curricula, teaching, and learning.

Purpose

This ePortfolio High-Impact Practice Taxonomy seeks to clearly define the features of ePortfolios as a high-impact practice in individual courses, across degree and co-curricular programs, and across entire undergraduate experiences. The taxonomy describes four attributes of ePortfolio practice along three dimensions of impact—*High-Impact*, *Higher-Impact*, and *Highest-Impact*. For the purpose of supporting student success the taxonomy aims to:

1. Provide guidance for course instructors, program directors, and campus administrators in planning, developing, implementing, and reflecting on ePortfolios in the context of course, curriculum, and program development;
2. Provide direction to campus ePortfolio professional development efforts; and
3. Provide a tool for encouraging program fidelity.

The taxonomy describes curriculum, pedagogies, ePortfolio-making skills, and assessment practices for ePortfolios. While many ePortfolio practices may align with current teaching and learning strategies, research tells us that instructors and program administrators will need professional development to achieve the highest-impact experiences for students. ePortfolio support is available through the IUPUI Institute for Engaged Learning. Contact the ePortfolio program director for current offerings and/or a consultation.

Contributors

Thank you to the members of the ePortfolio Taxonomy Workgroup for their time, input, and contributions to the development of the ePortfolio taxonomy: Cathy Buyarski, Tyrone Freeman, Brandi Gilbert, Steve Graunke, Susan Kahn, Sonia Ninon, Joan Pedersen, David Pierce, Amy Powell, Khalilah Shabazz, Lynn Ward, Cindy Williams, and Mike Yard.

ABOUT IUPUI TAXONOMIES

The IUPUI high-impact practice taxonomies support instructors in the iterative development and improvement of courses that engage students in active learning.

ABOUT IUPUI'S PATHWAYS PORTFOLIO

The Pathways Portfolio is created throughout the undergraduate experience to support student learning and integration of engaged learning experiences over time, as students explore, choose, and progress along their pathway to graduation.

Definitions

Authentic Audience: an audience other than the instructor

ePortfolio-making: skills and processes that support ePortfolio literacy

Identity development: exploration, articulation and commitment to multiple aspects of identity, including professional, civic, personal, and social

Integrative learning: a process of connecting learning across the curriculum and co-curriculum, from making simple connections among ideas and experiences to synthesizing and transferring learning to new, complex situations within and beyond the campus (AAC&U, 2009).

Metacognition: awareness, analysis, monitoring, and directing of one's own learning processes

Multi-modality: use of multiple digital media to communicate thoughts, ideas, and concepts, and to show connections; essential to ePortfolio-making

Pathway: a coherent, guided set of in- and out-of-class learning experiences from the first year to graduation

Reflection: an iterative process of examining experiences and ideas to integrate new learning with prior understandings or to adjust prior understandings in light of new knowledge

Scaffolding: instructional techniques providing appropriate levels of support to help students progress toward deeper understanding and more self-directed learning

Alignment with IUPUI Profiles of Learning for Undergraduate Success (PLUS)

Implementing each attribute of the taxonomy at the high, higher, or highest level may lead to development of student skills in the dimensions of PLUS. Below is a snapshot of how implementation of the ePortfolio taxonomy is connected to student learning outcomes in each PLUS area. In the taxonomy, each attribute is mapped to the specific PLUS learning outcome(s) students will develop through thoughtful implementation.

+ COMMUNICATOR LISTENS ACTIVELY, BUILDS RELATIONSHIPS	+ PROBLEM SOLVER THINKS CRITICALLY, ANALYZES, SYNTHESIZES, EVALUATES	+ INNOVATOR INVESTIGATES, CONFRONTS, CHALLENGES, MAKES DECISIONS	+ COMMUNITY CONTRIBUTOR ANTICIPATE CONSEQUENCES
Students express their learning and identity, making intentional choices in written, visual, and multi-modal formats, and adapting communications for different audiences.	Students articulate ways in which they have integrated learning from their chosen discipline and engaged learning experiences with skills learned in other areas to generate new understanding and solutions to complex problems.	Students use multi-modal evidence to demonstrate and narrate processes of investigating and confronting challenges, and designing and carrying out solutions to complex problems.	Students demonstrate their contributions to local and global communities through a curated collection and cohesive reflective narrative.
